

LIGHTWEIGHT POWER FOR DAILY USE

N2500DH 1" Pneumatic Impact Wrench

The IR N2500DH 1-inch pneumatic impact wrench with an extended anvil is the perfect tool for applications where users need to carry and hold the tool all day long. It is ideal for remote applications such as roadside assistance or fleet maintenance. Weighing only 6.95 kg, it is the lightest in its category, yet it delivers a maximum reverse torque of 2480 Nm, making it easy to remove stuck bolts, such as heavy truck wheel nuts. The N2500DH is capable of delivering a full day of work in mobile tire lane applications without exceeding exposure limit values for noise and vibrations.

Don't get stuck

With 2480 Nm of maximum reverse torque, you can forget breaker bars-no nuts will resist

Unmatched accessibility

The 360° auxiliary handle provides accessibility and maneuverability in all situations

Proven reliability

Built on the legacy of our Industrial 2925 Series impact mechanism, providing consistent and reliable operation

Reduce fatigue

Weighing only 6.95 kg, the light weight composite aluminium design delivers the best power-to-weight ratio in its class

Increase comfort

Low noise and vibrations to meet customer Health & Safety requirements for 30 minutes of bolting per day
