

COMPACT POWER UNLEASHED

No Bolt to Hide

EC815 3/8" Pneumatic Compact Impact Wrench

Introducing the Ingersoll Rand EC815 compact Impact Wrench. Built on Ingersoll Rand's 100 year legacy developing industry leading tools, you can always rely on the EC815. Whether you are in two-wheeler segment or doing industrial maintenance, the new EC815 offers the power and convenience essential for your daily tasks. In addition to being 15% lighter than its closest competitor, the twin hammer design of this tool ensures an unparalleled level of comfort, all at a cost that won't strain your budget.

No Bolt will resist
815 Nm of nut busting torque will provide user sufficient power to cover all application on motorbikes or industrial machinery up to M16 bolts without any resistance.

Get into narrow spaces
With 117 mm from tip to tail, it is designed to easily fit into confined spaces.

Maintain comfort all day long
This lightweight design of only 1.1 kg not only enhances your ease of movement but also contributes to a fatigue-free experience, allowing you to stay focused and productive throughout extended periods of work.

Keep control
The forward/reverse buttons positioned at the rear of the tool make one-handed control exceptionally convenient. The power regulator dial features 3 settings in forward, enabling power limitation and limiting over fastening.
